PeterLynn Ltd Statement - REACH Regulation EC 1907/2006

Thank you for your recent enquiry regarding the registration of PeterLynn's products with the REACH Regulation EC 1907/2006.

As PeterLynn is not a manufacturer or distributor of chemical substances we are regarded as a downstream user. This means that we are not required to register our products for REACH standards.

PeterLynn continue to monitor the registration of those substances by our suppliers and are able to confirm that the majority of our products do not knowingly contain in concentration above 0.1% weight by weight (w/w) any SVHC in the Candidate list published by European Chemicals Agency (ECHA) or Annex XIV of the REACH regulation (1907/2006/EC) – including the list updated January 12th 2017.

The exceptions to this are "Non Resistant" Thermal papers/tags (953, 963 or 983). These grades contain the chemical 4,4'-isopropylidenediphenol (CAS 80-05-7) also known as Bisphenol A (BPA) in a concentration above 0.1% (w/w).

Thermal Tag 963N-80
T983/CBP40/HG6 – Thermal Blockout Paper

The presence of a candidate substance has currently no direct legal impact on the production, nor the placing on the market of products.

If we are notified of any issues that might affect any of our products, we will update our REACH statement which will be available on our website www.peterlynn4labels.co.uk

Yours sincerely

James Lindsay
Managing Director
